## **JWord is available for JavaFX (2017-03-14)**

The powerful rich text editor is now available for JavaFX too!. Although the barebone editor is a Swing component, all the user interface elements (toolbars, dialogs, popups, menus etc) are reimplemented for a compatible JavaFX interface. It's now easier to integrate the editor into JavaFX applications both as a separate frame or as a component.

## **IRun 1.23 relased (2010-11-03)**

There is a new release of IRun RTF converter (v1.23).The new release includes some bug fixes.
