* Windows 32/64-bit evaluation

Features

Score Type	C	Formula
Math	M	$\text{ROUND}(((\text{CC}(1) - \text{WC}(1)) / 4.0) * 100) / \text{ITEMS}(1), 0)$
Science	S	$\text{ROUND}(((\text{CC}(2) - \text{WC}(2)) / 4.0) * 100) / \text{ITEMS}(2), 0)$
English	E	$\text{ROUND}(((\text{CC}(3) - \text{WC}(3)) / 4.0) * 100) / \text{ITEMS}(3), 0)$
History	H	$\text{ROUND}(((\text{CC}(4) - \text{WC}(4)) / 4.0) * 100) / \text{ITEMS}(4), 0)$
Score	S	$M * 1.2 + S * 1.2 + E * 0.8 + H * 0.8$

Designed with flexibility in mind

- User defined scoring formulas
- Support for tests composed of single or multiple sections

Grading using multiple distribution methods

- score limits: grade limits are determined by scores
- bell curve: grade limits are determined by

- Import/export data in standard formats (XLS,TXT,CSV,...)
- User defined fields for tests, questions, students and other.
- Support for multiple-choice, open-ended and mixed tests
- Calculating cumulative scores out of previous test scores

- bell curve bands
- percentile: grade limits are determined by percentile bands
- frequency: student frequencies can be specified for each grade

Maximum productivity with Item Bank and MarkReader

OMR Data Import

- author and print test booklets
- scan and read omr forms
- assess, score and report.

- Can import responses from both fixed length and delimited text files
- Can import OMR scanner and OMR software (such as MarkReader) output.
- Allows preprinting student and test information on optical forms as barcode, OMR and text.
- Allows registering students to database before importing student answers.

A complete testing suite. Integrated and productive.

10s of reports and graphs

Manage Exam Rooms

- Customizable test results

- Define a pool of rooms and physical

- Customizable result cards
- Item and choice analysis, discrimination, difficulty, skewness
- KR-20, KR-21, Croanbach Alpha, Spearman Brown parameters
- Frequency charts and tables
- Many charts and tables based on School, class, student vs course, topic, subtopic, outcome and skill summaries.

- locations with capacity
- Allocate rooms for each exam
- Distribute students to rooms via different methods
- Report room lists, student entrance cards,etc.

As secure as you want

- Function and category based access restrictions
- Password protection
- SQL database (Oracle, PostgreSQL, Sybase ASA)

Working Environment:

- 32/64 bit Windows 7/8/10 or later.
- 2 GB memory
