

JWord v4

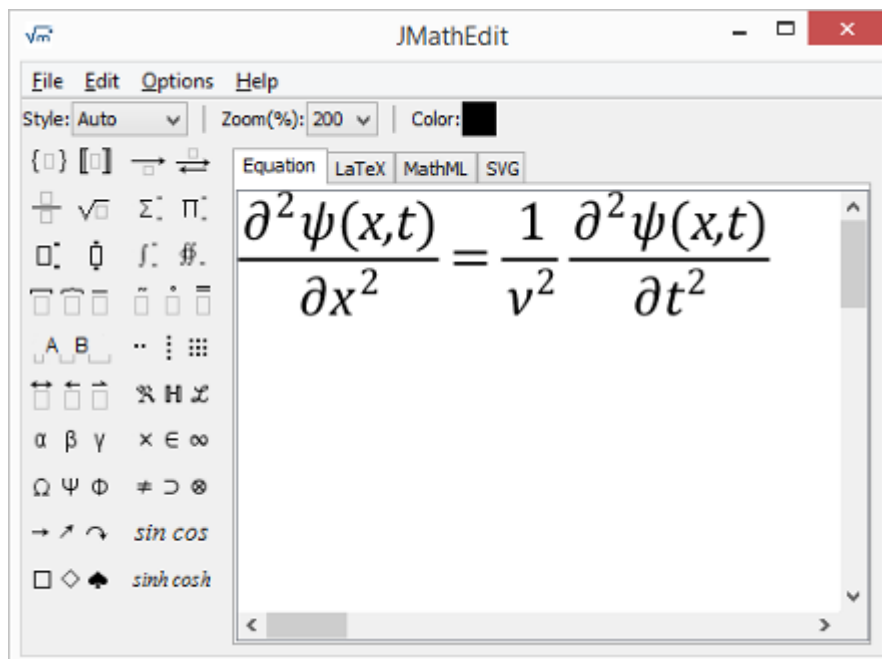

JWord is an advanced rich text editor for the Java platform (J2SE). With its rich set of features, JWord will power both your Java Swing based desktop applications and web based applications. Paging, multi-section documents including header and footers, tables, images, numbering, bulleted lists are among the features of this RTF and XHTML based editor. JWord works on XHTML, ODT (Open Document), and native XML files other than RTF, exports to PDF and XSL-FO, supports many bitmap (GIF, PNG, JPG, BMP) and vector (WMF, EMF, SVG) image formats and participates in clipboard actions. The lightweight control is also suitable for web based applications that require editing of XML, HTML or RTF based documents from within the browser.
